Health Records

The school district shall require that prior to a student's admittance to school for the first time the parent or guardian shall complete a medical history report form that includes information regarding known communicable diseases. The nurse or school physician may use such reports to advise the parent of the need for further medical care, as set forth in Board Policy 209.

The school nurse shall report the presence of suspected communicable diseases to the appropriate local health authority as required by the PA Department of Health.

A comprehensive health record shall be maintained for each student enrolled in the school district. The record shall include the results of required tests, measurements, screenings, regular and special examinations, and medical questionnaires.[17][24]

All health records shall be confidential, and their contents shall be divulged only when necessary for the health of the student or at the request of the parent or guardian to a physician. The district may disclose information from health records to appropriate parties in connection with an emergency when necessary to protect the health or safety of the student or other individuals, in accordance with applicable law and Board policy.[25][26][27][28][29][30]

The Board shall require that the medical history information submitted with health and dental examinations required under Policy 209 Health Examinations be periodically revised.
